Truexam - Frontend Assignment

Instructor can create task by simply opening index.html file and filling the data required in the form.

For marking the test Instructor must open marking.html and make sure local storage should have these 2 data.

a) Image uploaded by the student
   Key: "Task ID" +" "+Student;
   Data: ["Image data"," Image Data"];

   This data will be used to fetch the Task via search. So without this Search in marking.html won't work.

b) Name List of the Student

   Key: "Task ID" +" "+Name;

   Data: ["Student Name"," Student Name"];

   This data will be used to display the name of the Student. So, without this Search in marking.html will not work.
